

# Technical Advisory Bulletin: Hurricane Precautions

---

## Before the Storm:

- Review/update business continuity/disaster recovery plan.
- Review procedures with Emergency Organization or Emergency Response Team to ensure all positions are filled and all members are properly trained.
- Check general condition of the building, specifically the roof covering, roof flashing, and roof drains. Make all necessary repairs.
- Order emergency supplies such as plywood for windows, mops, brooms, tarpaulins for key equipment, sandbags, etc.
- Identify key equipment, stock and supplies, and vital records that will need to be relocated or moved.
- Have materials available to secure outside and/or roof mounted equipment such as cranes, signs, trailers, and HVAC equipment.
- Monitor commercial TV, radio, and/or Internet web-sites to keep abreast of weather conditions and issuance of watches and/or warnings.
- Test all generators, emergency lighting, UPS equipment, and sump pumps to ensure proper operation

## Impending Storm:

- Implement business continuity/disaster recovery plan.
- Shut down operations in an orderly manner and in accordance with emergency shutdown procedures.
- Check all fire protection equipment such as sprinkler control valves and fire pumps.
- Fuel all fire pumps, generators, company vehicles, power equipment such as saws, etc.
- Install hurricane shutters or plywood over windows and doors.
- Cover computers, machinery, and stock and supplies with tarpaulins.
- If possible, remove any equipment, finished goods, or items off the floor.
- Secure outside and/or roof mounted equipment such as cranes, signs, trailers, and HVAC equipment.
- If necessary, turn off utilities to reduce the probability of a fire/explosion.
- Conduct final inspection of building and make emergency repairs.

## After the Storm:

- Secure the facility.
- Survey for damage-take pictures of any damage to both the building(s) and its contents.
- Avoid loose or dangling power lines and report them to utility company, police, or fire department.
- Before utilities are returned to service, check for gas leaks, look for electrical system damage, and check for sewage and water line damage.
- Begin salvage operations as soon as possible.
- Clean debris from roofs and property if safe to do so.
- Use telephone only for emergency calls.
- Use pre-established property conservation programs such as sprinkler impairment procedures and cutting and welding permits when repairs commence.
- Stay tuned to local radio for information.
- Critique pre- and post-storm actions to identify strengths and weaknesses and make necessary modifications to prepare for the next emergency.

## Solutions for Your Challenges

The Trident Risk Control team provides our customers with cost effective risk management solutions to prevent and reduce losses. We have extensive experience helping our clients create a customized strategy that addresses the unique and often complicated risk management concerns of the public sector.
